

Summary

The assignment requires building a React application named `third_app` with a structured folder organization, including `components` and `css` directories. The app features four main components: a Bootstrap Navbar (`Header.jsx`), a Bootstrap Accordion (`Accordion.jsx`), a styled registration form (`RegistrationForm.jsx`) using Bootstrap, Font Awesome, and Flexbox, and a Bootstrap footer (`Footer.jsx`). The registration form includes fields for Name, Email, Phone, City, and Address, styled with custom CSS. All components are imported and rendered in `App.jsx` in the order: Header, Accordion, RegistrationForm, and Footer.
